EDUCATIONAL QUALIFICATION

Bachelor of Engineering in Computer Science and Engineering May 2027
CGPA: 9.57

EXPERIENCE

InAmigos Foundation — AI Web Developer Intern [Certificate] REMOTE JUN – AUG 2026

- Developed responsive frontend interfaces using **React.js**, improving cross-device usability and overall user experience.
- Integrated the **Google Gemini API** to build an AI-powered recommendation feature that generates personalized reasons for users to choose InAmigos.
- Implemented **user interaction tracking** to analyze engagement and improve the overall website experience.
- Identified and resolved **frontend bugs, UI inconsistencies, and usability issues** to improve application reliability.

PROJECTS

WEATHERGPT Github Live

React, Node.js, Express.js, MongoDB, Socket.IO, Gemini AI, Twilio, MapTiler, OpenWeather API

- Developed an AI-powered **weather forecasting and disaster management platform** tailored for smart city monitoring and climate analytics for researchers.
- Engineered a real-time **alert generation system** utilizing **Twilio SMS** and **Web Push** notifications, synchronized with **OpenWeather API** and **MapTiler** for precise reverse geocoding.
- Integrated the **Gemini Flash model** to deliver localized climate insights, incorporating **voice-enabled interaction** to ensure broad rural offline accessibility.
- Built a scalable **MERN stack** backend featuring **Socket.IO** for live meteorological data streaming, optimizing evaluation metrics for accuracy, relevance, and response latency.

FINDER Github Live

HTML, CSS, JavaScript, MongoDB, EJS, Node.js, Cloudinary

- Developed a full-stack **hotel and resort management platform** with booking, reviews, ratings, and property management.
- Built using **Node.js, MongoDB, EJS, HTML, CSS, and JavaScript**, following the **MVC architecture**.
- Integrated **Cloudinary** for image upload/storage and **MapTiler** for interactive map functionality.
- Designed a structured backend architecture supporting scalable routing, data management, and server-side rendering.

COLLAB-ON-CANVAS Github Live

React, Tailwind CSS, HTML5 Canvas, Node.js, Express.js, Socket.IO, Vite

- Developed a **real-time collaborative whiteboard** supporting private solo drawing and room-based multi-user collaboration.
- Built a responsive **React + Tailwind CSS** frontend with the **HTML5 Canvas API** for interactive drawing, color selection, brush controls, erasing, and image download.
- Implemented **Socket.IO room management and real-time drawing synchronization**, enabling users to create, join, and leave collaborative sessions.
- Added **canvas history synchronization and responsive resizing**, and deployed the full-stack application on **Render**.

SKILLS

- Programming Languages:** C/C++, Java, JavaScript, SQL, NoSQL, HTML/CSS
- Frameworks & Libraries:** React, Node.js, Express.js, Socket.IO, Tailwind CSS
- Databases & Cloud:** MongoDB, Cloudinary
- Developer Tools:** Git, GitHub, VS Code, Figma, Linux/Unix
- Core Areas:** Data Structures & Algorithms, Full-Stack Web Development, Competitive Programming

RELEVANT COURSES

Data Structures	Object-Oriented Programming (OOP)	Computer Networks
Algorithm Analysis	Operating Systems	Database Management Systems (DBMS)

ACHIEVEMENTS

- Solved 100+** problems on LeetCode and Codeforces [Profile]
- Secured **GMR 167** in JELET with **99 percentile**, ranking in the top **0.596%**
- Won **1st place** at the **NCP-ROBO** competition

CERTIFICATIONS

- DELTA Web Developer Bootcamp 2025**
- ALPHA Competitive Programmer Bootcamp 2026**
- NPTEL Soft Skill Development**
- NPTEL Database Management System**
- Udemy: Mastering Data Structures and Algorithms using C and C++** — Abdul Bari
